

Since joining the NorthBridge Group in 2001, John Hutchinson has provided financial and economic analysis and advice to a number of clients within the electric utility industry. Representative projects include the following:

- For a large nuclear operator, he developed Zero Emission Credit (ZEC) programs which have been successfully implemented in multiple states.
- For a Midwestern electric utility, he negotiated changes to state renewable portfolio standard (RPS) design as part of a multi-party stakeholder process.
- For several clients, he evaluated enterprise, utility and customer impacts of legislative and regulatory initiatives in numerous jurisdictions.
- For a Midwestern electric utility, he supported the design and improvement of energy efficiency programs.
- For a large generator, he promoted modifications to the EPA clean power plan for regulation of carbon dioxide from existing source.
- For a large Southeastern electric utility, he completed a transmission investment cost/benefit analysis, and market power assessment in support of a transition-to-competition proposal.
- For a utility operating across a number of state regulatory jurisdictions, he supported the client's efforts to restructure for competition, including analysis of several candidate RTO configurations.

Before joining NorthBridge, Mr. Hutchinson was a transportation system consultant at ALK Associates, Inc. in Princeton, NJ. Mr. Hutchinson received a B.S.E. in Civil Engineering and Operations Research from Princeton University. He also received an M.B.A. from the Massachusetts Institute of Technology, Sloan School of Management.
